Contact us for a demo phone no 9213676208, email id : v_software@rediffmail.com or visit [\[www.vijayerp.com\]](http://www.vijayerp.com) for more information.

Why Choose VijayERP?

- **User-Friendly Interface:** Intuitive design for easy navigation and quick adoption.
- **Security and Compliance:** Ensure the safety and confidentiality of your data.
- **Continuous Updates:** Stay ahead with regular updates and new features.

The company sends its materials to vendors for processing. The vendors work on the materials and return them to us, along with a job worker challan or invoice. With VijayERP, we can manage all these tasks in one system. We start by creating a purchase order, followed by an RGP Challan to send the materials to the vendor. Once the vendor completes the work, they create a challan and return the materials to us. We generate an MRN from the challan, and the materials are added to our stock. To view the stock balance, we can check the summary sheet to see what materials are pending with the dealers, what has arrived, and how it arrived. Additionally, we can use the NRGP Challan option to send out samples.

VijayERP: Enhance Your Business Operations with Flawless Efficiency

Welcome to VijayERP, your all-in-one solution for streamlined business processes. VijayERP is designed to enhance efficiency, simplify workflows, and provide real-time insights into your operations. Explore the features that make VijayERP the perfect choice for your business.

Key Features:

1. Effortless Purchase Order Management:

- Create, track, and manage purchase orders with ease.
- Streamline the procurement process for improved efficiency.

2. RGP Challan for Smooth Material Dispatch:

- Generate Returnable Gate Pass (RGP) Challans effortlessly.
- Ensure seamless dispatch of materials to vendors for job work.

3. Vendor's Challan and Material Receipt:

- Efficiently manage material receipts and generate Material Receipt Notes (MRNs).

4. Robust Stock Management:

- Gain real-time visibility into stock levels.
- Track stock movements and manage inventory effectively.

5. Insightful Summary Sheets:

- Access comprehensive summary sheets for stock balances.
- Analyse pending materials and track arrivals with precision.

6. NRGD Challan for Sample Dispatch:

- Send samples hassle-free with Non-Returnable Goods Permit (NRGP) Challans.
- Keep track of sample dispatches for better control.

7. Advanced Reports and Analytics:

- Utilise powerful reporting tools for data-driven decision-making.
- Customise reports to align with your business requirements.

8. Enhanced Efficiency:

- Tips and best practices for optimising workflows.
- Integration options for a seamless business ecosystem.
